TRAFFAX

THURSDAY, JANUARY 29, 2004

Turner Turnpike- Motorists should expect traffic delays as the bridge located just west of the Wellston Concession area at milepost 155 undergoes rehabilitation.

Turnpike mainline traffic will be reduced to one lane both east and westbound as the westbound deck is removed and reconstructed. Motorists are urged to allow extra time, use extreme caution, and obey reduced speed limits while traveling through the work zone. This project will be completed in the summer.
